York County Wetlands Board

SUBJECT: 102 CREEK CIRCLE – PROTEST
Application 09-26; VMRC 09-0806

To Whom It May Concern:

I am writing in opposition of the current proposed shoreline project at the above property. My main concern is preserving the navigable channel in Cabin Creek. Due to the volume of fill that is proposed to be deposited on the property and in the water, I don't see any way that this project can go forward without negative effects on the waterway, nearby properties, vegetation, and wildlife. It does not appear that this property has any erosion problems as it is. As we have seen in other locations, shoreline changes on one property can have significant negative effects on neighboring properties. Therefore I feel this proposal is well beyond what is necessary. My neighbors and I should not have to go to the expense of shoring up our properties and dredging the channels because of a project that could have been prevented. I am hopeful that the owner and his engineers can develop a new solution. I appreciate the opportunity to express my opposition and hope that you will take the comments of my neighbors and me into careful consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason D. Medford", with a long horizontal flourish extending to the right.
